

VIRTUAL MOBILITY (VM) GRANT Report

This report is submitted to the Virtual Networking Support Manager, who coordinates the evaluation on behalf of the Action MC.

VM grant title: Quantinar a p2p knowledge exchange platform

Grantee name: Wolfgang Karl Härdle

Working Plan fulfilled

We heavily used the Q2 eco system quantinar.com , quantlet.com. to spread quant knowledge embedded with code in the form of Quantlets. The peer-to-peer education network has been further developed with new courselet and it has been used to spread COST FINTECH results at conferences and workshop in Constanta, RO, St Gallen, CH, Berlin, DE.

The Blockchain-Research-Center.com has been extended with more data sources. New courselets on eg.

Statistics of Financial Markets, <https://quantinar.com/course/103/statistics-of-financial-markets>

DEDA Digital Economy & Data Analytics, <https://quantinar.com/course/23/Blockchain>

have been added, now the courses are complete.

We extended to *FRM Financial Risk Meter, Machine Learning in Finance, Digital Asset Knowledge Proliferation*. We have created 3 courselets to the new area of *Applied Time Series Analysis with Python*. We finished therefore task1-4 of our application.

This VM grant employed a multi-disciplinary approach and builds on previous work that will be beneficial for the further evolution of the COST Excellence and the existing blockchain technology ecosystem. It leads to new links in research for NNC countries and internationalise the COST research results.
